Kayla Giroux-KG	YYC
Mariel Higuerey-MH	YYC
Stacy Demers-SD	YYC

Airport Movement Statistics

- The total movement stats have increased in 2016 over 2015 with a total of 156,995 movements in 2016.
- The annual jet night traffic statistic slide shows the total amount of traffic that operates between the hours of 23:00 and 07:00 hours. In 2016 there were a total 14 jet movements at YBW between 23:00 and 07:00.

Noise Line Statistics

- The Runway Usage slide shows from a statistical point of view most of the runways are used fairly evenly, with a slightly higher usage of the west departing runway, and the least amount of usage on the east departing runway
- Month over Month stats indicate that in the calendar year 2016 the majority of our calls came in May thru July.
- The volume of noise/concern calls have decreased.
- Many of the concern/noise calls came in between 15:00 and 17:00 in the afternoon.
- There were a total of 14 jet movements with no jet noise complaints for 2016
- **Noise Monitoring**
- Actual monitoring location was off the end of Runway 35.
- Opportunities will be investigated to enhance noise monitoring capabilities at YBW.

General Discussion

Suggestions from the committee:

- Calls are down because of a perception that little is done
 - Callers are encourage to continue to make contact with the airport – without information we can't investigate the issue, advise the caller, or record the data.
- A great deal of positive change from the helicopter operators.
- Limited jet traffic to qualify- more data was required.
- Committee suggests locating a monitor out to the community to get a more community noise levels

New Business

- Wings over Springbank Airshow is being held July 29th and the 30th 2017
- A new Committee terms of reference was introduced
- Committee meeting dates - biannual meeting dates for May and November.

Meeting adjourned at 20:30
